November 7, 2017

Dear Child Development Center partner,

Thank you for your referrals to Child Development Center for the past 40 years. It is because of your support and trust that we have been able to provide these essential evaluation and diagnostic services.

The State of Montana has notified all Evaluation & Diagnostic Programs across the state that contracts will not be renewed. This means that the Child Development Center will not be able to provide your clients/patients with developmental/autism evaluations after December 31<sup>st</sup>, 2017. Therefore, we will not be able to take any new referrals after November 20<sup>th</sup>, 2017.

We are unaware of what the State plans for future Evaluation & Diagnostic services, but when we do know, we will be sure to keep you informed.

To help the families and children you serve and support, attached is a list of resources. Be assured, Montana's Early Intervention Programs remain intact; therefore, please contact Family Outreach, Inc. for early intervention information and expertise.

Thank you again for your endless support over the years.

Sincerely,

Carolyn Prussen  
Executive Director, Child Development Center

Catherine Haflinger  
Evaluation & Diagnostic Program Director, Child Development Center
